

FreeFlight Aviation

FreeFlight Aviation was set up by Ian Valentine in order to share his passion for these brilliant next generation aircraft. His vision is to see pilots have access to a better, safer breed of aircraft than the old "spam cans" of yesteryear. The group now has six aircraft, one SR20, which was Ian bought shortly after passing his PPL, and has subsequently acquired five more powerful SR22's, a 2003 Centennial edition, two G2 models and two GTS models. Due to changes in my flying circumstances I have shares in the group available.

FreeFlight aviation has also gained the moniker "147 group" because all the registrations start with N147. N147CD is the SR20 based at Denham, N147VC, the SR22 Centennial based at Wycombe, and N147GT, the SR22 G2 also based at Denham. 2006 has seen some rapid expansion with an owner of an existing G2 aircraft bringing it into the group (N23AM, AKA N147LD), based at Denham and two GTS models, N147LK based at Blackbushe and N174SR (AKA N147KA), based at Shoreham. The group operates with both shareholders and member schemes and is already looking to get more people involved so we can acquire and base aircraft in other locations. Interested? Why not visit the FreeFlight Aviation site at www.cirrus147.com.
