

Cirrus Group Shares for Sale

Due to a change in our flying habits, I'm offering for sale my shares in the Freeflight Aviation group which operates SIX Cirrus aircraft. As early shares these offer entry into the group at prices much much lower than new entry can be achieved on the open market.

Read more and/or see the FAQs.

Freeflight Aviation (sometimes known as the Cirrus147 group as all the tail numbers start N147) operates two Cirrus SR22 aircraft from Denham, an SR22 and an SR20 from Blackbushe, an SR22 from Wycombe and an SR22 from Shoreham.

The shareholdings available are in N147CD, the SR20 based in Blackbushe and N147VC an SR22 based in Wycombe, but membership of the group entitles shareholders to fly ANY of the group aircraft. Dry rate works out at approx £94/h on any of the aircraft - not bad for a glass cockpit 180 knot aircraft.

The two blocks of shares are available for just £12,500 each (£25Kthe two) - to buy into the group now would cost you as much as £20K for a single block of shares.

To find out more contact me and see the Fly Cirrus section on the site. There are also quite a lot of photos of the aircraft on my aviation photography site in the Cirrus section.
